Dear Parents and Carers,

As we approach our transition sessions and are preparing children for the next academic year, I wanted to share a change about how our current Year 5 pupils will be taught as they move into Year 6.

Next year, we are introducing a model where two teachers will work closely with the whole cohort. Children will be taught as a cohesive cohort, allowing us to maintain a strong sense of community and shared experience across the year group. This approach gives us greater flexibility to adapt teaching and learning to meet the needs of every child.

Having two teachers for the cohort means we can create more fluid groupings throughout the day. Children will have opportunities to work in different groups depending on the task, enabling us to provide targeted support where needed and additional challenge where children are ready to extend their learning further. This ensures that every pupil continues to feel supported, engaged and motivated to achieve their very best.

We are confident that this structure will enhance the quality of teaching and learning, promote independence, and allow every child to thrive academically and personally. Most importantly, it enables us to respond quickly and effectively to individual needs, ensuring all are given the opportunity to excel.

As always, we remain committed to providing a nurturing, inclusive environment where children feel confident and inspired.

If you have any questions or would like further information, please don't hesitate to get in touch.

Thank you for your continued support.

Yours sincerely,

Rachel Watts
Headteacher
